

TELCO LINE ROUND MARKER VULCAN H41 BULLET MARKER

Our Round marker is The Vulcan Bullet Marker. The marker provides a full 360 Warning Message that demands attention!

- ▶ **MATERIALS:** The post or poly tube is specially formulated High-Density Polyethylene {HDPE} for outdoor durability. The Bullet Head is the same HDPE material.

We specify specific high grades of pigment for color retention outdoors. Additionally, a UV stabilizing component to further prevent premature fading due to the UV in sunlight.
- ▶ **DECORATING:** The cross section, shown below, was designed for strength when driving in the ground and keeping it from buckling. The design of side rails allows for protection of the message during installation and in transit. The backside bubble adds more mass for strength but is gentle enough for decoration. Our shape has more mass than any other similar product used in this application. Each marker has a pointed end for installation.
- ▶ **SIZING:** The overall length of the marker includes the printed Bullet Head. The most common length is 72". The wall thickness of the post itself is the industry standard. The height of the printed Bullet Head is typically 18". A 24" Bullet Head can be provided allowing for more message. This size of the marker is 3.5" outside diameter.
- ▶ **ANCHOR:** We can affix a plastic "clip" anchor to each post prior to shipping for direct bury applications.
